

DFA LEAN SEMINAR, KICK OFF

New dates: 21-22 of November 2023, in DK

Danish Farmers
ABROAD

For managers
For specific lean functions or related support functions
For HR and integrators

ON THE 2 DAY SEMINAR

we will dig into the Lean way, the lean principles and the lean tools – and how to implement it with great commitment in the organization. How Lean works both to optimize efficiency and to create better work satisfaction – and not at least to get everybody to take more responsibility and achieve commitment to the goals, the everyday work and continuous improvements.

THE FORM

The lean theory will be presented together with relevant cases. You, the participants will share your experiences with Lean already, or your challenges in general in your processes. We will use that for not just understanding Lean but also, at the seminar, working with it.

We will visit companies which have different experiences with Lean, and you will meet and hear from Lean enthusiasts.

THE ELEMENTS AT THE SEMINAR

KNOWLEDGE and INSPIRATION on Lean tools and topics from different experts

- Eg. The **Lean principles**, and waste types - and the key how to work with Lean
- Getting **continuous improvements** as a part of the culture
- **Target management** – how to set targets, in a motivating and result creating way
- Involving **whiteboard meetings**
- **Improving processes**, quality, safety with value
- **Value stream mapping** and standards
- **5S** great examples and results
- How to succeed with **IMPLEMENTATIONS?** E.g. using Nudging principles and awareness
- **Many examples** will be from within the agriculture areas, some will be from other industries.

Working with Lean theory and cases in an involving and interactive way

Exchanging experience and challenges with lean implementation
